Black Forest

Collecting trip
Monday May 15th 67

8:10 left Vahlgren -
at 19 am
thru the aspen
to Black Forest (sign post says it) at 10:15

Turned down dirt track
left in unpurged timber
down into gully - selected
Camp site at bottom
Springbank stream
Summit of hill forest
Set out collecting

1 *Petroica muchentorum* ♀
plumage ~~plumage~~ beside
track - Set food on
stump. legs dark
legs blackish brown both
blackish patch yellowish

(2) *M. lunata* W 7387
legs black
shin be orange
legs greyish feet
lighter bill blackish
Patch be orange
Kiss note

2

3 *M. lunatus* W 7388

Tail Schizophyl
 Bill black eye dark
 legs grey feet grey
 Palate be orange

4 *M. lunatus* W 7389

Thrs be skin orange red
 Bill black legs brown
 Palate be orange
 in Selva Forest

1200 Lunch - border belly

1.30 Collecting again after
 changing up.

During morning some
 seen *Syncebus*
procerus^{2,3} *notatus*
superbus [♂] *several*
hypsaethra australis
Platycercus chrys
 excellent plumage
Chimaphys leucophaea
 2-3

5 *M. leucotis* W7390
 Bill ~~dk~~ black
 Ires dk brown
 legs + feet grey - pink
 lighter Palate orange

6 *P. elegans* W7391.
 Ires brown
 Bill 2/3 grey upper
 grey lower
 Legs + feet grey - self-pink

7 *C. leucophala* W7392
 Ires brown
 Legs grey, feet also
 Bill Blackish brown
 Palate - flesh white

8 *Collocalia hirsuta* W7393
 Ires rich chestnut
 brown
 Bill Black
 Palate black
 legs + feet steel grey
 Seb. forest - silent

15:30 Returned to
Camp - moving
out for even along
roads.

Went into flat
portulac asphalt
^{chapt} just past
~~road~~ 39 mile
peg - forest land
section - here
collected

9 *P. elegans* W7394
Large br. bell grey
white legs black
grey. On burnt forest
prunex

10 *I. danyana* W7395
2nd ^{dark} brown
Legs pale brown
Bell dark brown
On burnt forest ash floor

W7396, -7, -8, -9

11, 12, 13, & 14

Calliophthalmus *pusillus*
all for small lot

Rock - sub forest
prange

200 db brown and
can

Bills grey
legs grey.

15 M. *hirsutus* ^{W 7400}

Call S. m.

Has to be many

Bill blackish

Legs dark then

Forest back

Sitting to camp.

Working has now at 1900
after tea.

The Black Forest is

obviously, and many
parts a dry sclerophyll
forest vegetation
with possibly occasional
patches of wet sclerophyll
in gullies

appears to be a
predominance of
Acacia? *Stenopogon*
Peppermint etc

1900 To be

May 15 - 1900

Went up

to the top of the mountain
to see the view of the
valley below.

6 *Phyllocladus patens* *pycnophloea* W7401

Large tree with
dark bark
leaves about 1/2 inch long
1/2 inch wide
leaves above.

Soil - poor, sandy -
Sun.

17 *Podocarpus* W7402

18 *Leucophaea* W7403

Small tree
light bark
leaves about 1/2 inch long
1/2 inch wide
leaves pale green
dark below.

19 *P. chrysomela* W7404
 2nd inst. brown
 feet white
 legs black
 body black
 head black

20 *Myiophobus* W7405
 2nd inst. brown
 legs black
 body black
Call 2 mae

Note

It is possible to find
and
manage the

accompanying the
business, thereby

the amount of collecting
needed with the travel
has been at
present to the
property, research
I have been able
and official permission
to collect at school
for collection
but confined to
South west "island"
area. There
government is

Forest but I shall not
enter area for nothing
at any future time
without letter in phone
contact with him
as official post
has a great sign
his residence
will work to go
on future measures

Note also Neophema -
deep green bird -
seen at Lake - near
port N. Chyngall
in sample - must
be a call
Next on ground found

Ken Selwyn & his

Two Labrador (cross?)

Type: 4 Honeycombs

arrived at 2:30 -
went straight into
property chambers
rooms - rail horse
barn.

Spent till 7:30
shooting. Dogs worked
in house - good dogs
- Schuster found
fairly plentiful.
Newton shot

I shot 1

(4 birds left - at his
request - for property
owner. Beyond
on grounds museum
owner if I was not

responsible for
owner's illegal
possession - a closed
question if he so wished,
museum has right to donate them even if
couldn't give him the right to have them.

128

From point to bank
- am roughly 50
miles out 7 hours
work flying birds that
I could not get out
them quickly &
expensively.

Departed 4:40 -
bank over Wedgite
Bridge SE Ferry
~~Point~~ Richmond
where I run
back to
Essexford at
17:10. - very
good

The habitat was
heavily grazed

postmarked
 about several
 times now back
 (apparently) behind
~~us~~. Remarkable
~~and early~~
 that the car, I am,
 occurs, without
 the $\frac{1}{2}$ one having
 any awareness of
 it.

At least four large
 hives (Lepus europaeus) got
 up in the paddock during
 our day

Bunyip Creek area
~~20th~~

 Waburton
 1981

Sunday, July 26th

To display Pherson
 specimens about
 40 in number

10:15 Degan Valley
 arr. Super Sables
 Hotel Waburton
 11:20 Set up specimens
 (ca 40 Pherson
 skins) in
 conference room

2.30 - 3.30

Bruf introduced
 then displaying
 specimens for
 the members

much appreciated

To be explored:

Idea of preserving
 skins ~~(as skins)~~
 (as skins in
 a running one)
 to be discussed
 and perhaps
~~organized~~ initiated

= Idea of selling up
 a collection of
 birds that show
 what the species
 ought to be like
 e.g. Lady Amhurst
 without Golden
 Pheasant characteristics

I was also assured
 that high level
 discussion ~~and~~
 concerning fifty
 bon on import of
 Pheasants is being
 held & should
~~show~~ response
 within 2 years
 & is deemed that

Now at 14.50 we
 came at the ~~dams~~
 dam after long
 walk. Mike & I
 agree that we
 have seen remarkably
 few birds for the
 day & that the bird-
 population seems
 to have changed
 since earlier
 years so no
 Hooded Merganser
 No Speckled
 Warblers —

very little general
 bird activity.

This morning
 we also put up
 a fox on Wilson
 - mid-Cass to Sandy
 with white bird eye
 - resting on rocky
 hillside.

Protective Foliage Cover of Tallest Stratum*

Very Sparse
 $ZZ = (0, 10,)$

* Isolated trees (emergents) may project from the canopy of some communities (Richards, Tansley, and Watt, *Imp. For. Inst. Pap.*, No. 19, 1939).

[†] Some ecologists prefer to ignore scattered trees and shrubs, equivalent to emergents in a predominantly grassland, heath, or shrubland formation.

‡ A tree is defined as a woody plant more than 5 m tall, usually with a single stem. A shrub is a woody plant less than 8 m tall, frequently with many stems arising at or near the base (slightly modified from Beadle and Costin, *Proc. Linn. Soc. N.S.W.* **77**, 1952, 61).

§ These formations are rare in Australia.

c Appropriate names for the community will depend on the nature of the dominant herb.
